Abbos Jabborov

Gameplay Engineer | Core Gameplay Designer

abbosjabborov12@gmail.com claive.uz github.com/AbbosJabborov linkedin.com/in/abbos-jabborov-328a53220
Budapest, Hungary

Summary

Unity gameplay engineer and 3C designer, co-founder of Tonto Studio, leading development of Desire Lines, a PSX-style driving roguelite with a live Steam page and 1000+ wishlists. Shipped 2 Play Store titles and worked on an 8-person team through a trailer release. Strong in C# gameplay mechanics and controls, rapid prototyping and multiplayer (FishNet), with 3 competition awards totaling $3,730.

Skills

Engine and languages	Unity, C#, Python
Architecture	SOLID, MVP, MVVM, VContainer (dependency injection)
Networking and async	FishNet, UniTask
Tools and libraries	DoTween, Git / Git Flow, Blender, Photoshop
Backend (secondary)	Django, DRF
Design	3C (character, camera, control), rapid prototyping, UI/UX

Experience

Co-founder & Lead Developer, Tonto Studio · Part-time, remote — Jun 2025 – Present

- Architected *Desire Lines*, a PSX-style driving roguelite, from concept to a live Steam page with 1000+ wishlists.
- Built procedural map generation for each run, inspired by the dungeon generation in The Binding of Isaac.
- Lead a 5-person team toward a demo release scheduled for Q4 2026; own code reviews, design discussions and task management.

UI/UX Designer, HexForge · Contract, remote — Oct 2025 – Jan 2026

- Redesigned and implemented the UI system across 2 existing projects, replacing Unity's default debug UI with handmade designs that match each game's atmosphere.
- Fixed critical bugs and performance bottlenecks by reducing draw calls and optimizing CPU time with improved core system logic.

Gameplay Engineer, TryVox Studio · Full-time, on-site — Jun 2025 – Aug 2025

- Built the whole interaction and movement system for *Don't Touch My Dacha*, a culturally themed simulator, in an 8-person team.
- Delivered core mechanics for the official trailer release (watch trailer).

Unity Developer, ITIC Games · Full-time, on-site — Dec 2024 – Jun 2025

- Built 6 hypercasual mobile prototypes and independently shipped 2 to the Play Store (1k+ downloads).
- Took part in code reviews and technical discussions with senior developers.

Awards

- Best Game Design, GameFest 2026
- 2nd place, GameFest 2025
- 2nd place, National AI Hackathon (shadow.claive.uz)

Education

BSc Computer Science Engineering, Óbuda University, Budapest · expected 2030
